Short title: Analytical approximations to the l-wave solutions of the Schrodinger equation with the Eckart potential.

MR Number: 2371134

Primary classification: 81Q05

Secondary classification(s): 33C05

Review text:

Just another discovery of the solvability of certain Schroedinger equation in terms of the Gauss hypergeometric functions. The key "l-wave solution" idea of this paper has already been explained, sufficiently thoroughly, in the Fluegges 1971 book "Practical Quantum Mechanics".
