Author: Fellows, Jonathan M.; Smith, Robert A.

Short title: Factorization solution of a family of quantum nonlinear oscillators.

MR Number: 2525883

Primary classification: 81Q60

Secondary classification(s): 81Q05

Review text:

A very extended and detailed (13pp) comment on reference [1] (abbreviated CPRS) where Cariñena et al rediscovered the Hermite-polynomial solvability of a supersymmetric partner of harmonic oscillator. It is worth noticing that another, slightly more general version of the same idea has also been published earlier (cf. A. Sinha and P. Roy, Czechoslovak J. Phys. 54 (2004) 129 - 138).
