Author: Gadella, M.; Glasser, M. L.; Nieto, L. M.

Short title: The infinite square well with a singular perturbation.

MR Number: 2810776

Primary classification: 81Q10

Secondary classification(s): 47N50

Review text:

In a continuation of the (unfortunately, not well cited) study [1] of the influence of a perturbation of the point-interaction type on the linear and quadratic potentials the authors choose now the square-well unperturbed potential. Elementary formulae and two pictures display the results when the perturbation is, or is not, centered at the origin.
